

Interoperability in Action

A workshop series organised by Digital Convergence Initiative to discuss and demonstrate interoperability in the social protection sector.

Workshop #3: Social Protection Information System interacting with Identification System

21 February 2023
12:00 - 14:00 GMT

About the Digital Convergence Initiative

The **Digital Convergence Initiative (DCI)** is a joint effort by USP2030 members, governments, development partners, civil society, and the private sector to support national social protection systems to advance meaningful data exchange via standards-based interoperability.

Interoperability in Action

Interoperability in Action is a DCI workshop series for the development and consensus building on standards for integrated social protection information systems. This series brings together social protection practitioners and information technology experts from government agencies, private sector, open-source software solution providers and international organisations.

These workshops are a forum to exchange use cases, interfaces (API & data standards), and experiences regarding the interoperability of systems through the [use case scenarios and technical demonstration](#) in a controlled environment.

The workshops will be conducted virtually, with each session highlighting a specific system (e.g., ID, CRVS, Payment) interoperability capability scenario with Social Protection beneficiary Management Information System (SP-MIS). Each session is designed to facilitate a deep dive into process, functional and technical aspects of interoperability between the systems.

Structure of the session

The Third workshop in the series, will discuss some use cases of interoperability between Identification Systems and SP-MIS systems, and demonstrate the Integration of SP-MIS with MOSIP ID Solution. The demonstration will highlight the value of interoperability for delivering social protection programs.

The workshop will encourage open discussion and feedback on various aspects including use cases, data fields and technical interfaces (API). We also encourage inputs regarding availability of different vendors of open-source solutions, which can be used for interoperability of SP-MIS, ID system, thus enabling consensus building on standards.

Agenda

Duration	Session plan	Who
20 minutes	Welcome, Context Setting, & Lightning Talk by Estonia	DCI Kristo Vaher, Estonia Chief Technology Officer
40 minutes	Integration of SP-MIS, ID System (Presentation & Demonstration)	DCI
Brief Interventions from Country, International Organisations, Solution Providers		
30 minutes	Country inputs	Pramod Varma, India CTO, EkStep Foundation
	Global Perspective	World Bank
	Global Perspective	Joseph Atick, Executive Chairman ID4Africa
	Solution providers ID systems	Sasikumar Ganesan, Head of Engineering, MOSIP
25 minutes	Open Discussion	All Attendees
5 minutes	Conclusion	DCI
