Digital
Convergence
USP2030

The Digital Convergence Initiative (DCI)

A joint effort by USP2030 members and non-members, governments, development partners and private sector towards creating a harmonized and interoperable digital ecosystem for social protection

Building consensus-based standards for interoperability to

- **foster an ecosystem for innovation** by ICT solution providers to build products that are interoperable, easy to use, integrate, maintain and scale
- **reduce time and costs** of developing solutions at the country/program level
- enable programs and countries to **mix and match different components** from different suppliers
- **ensure that systems are future-proof by design**, regardless of current levels of policy and information systems maturity

Digital
Convergence
USP2030

Talking interoperability

A monthly dialogue series by the DCI to facilitate in-depth technical conversations around integrated and interoperable SP information systems across countries

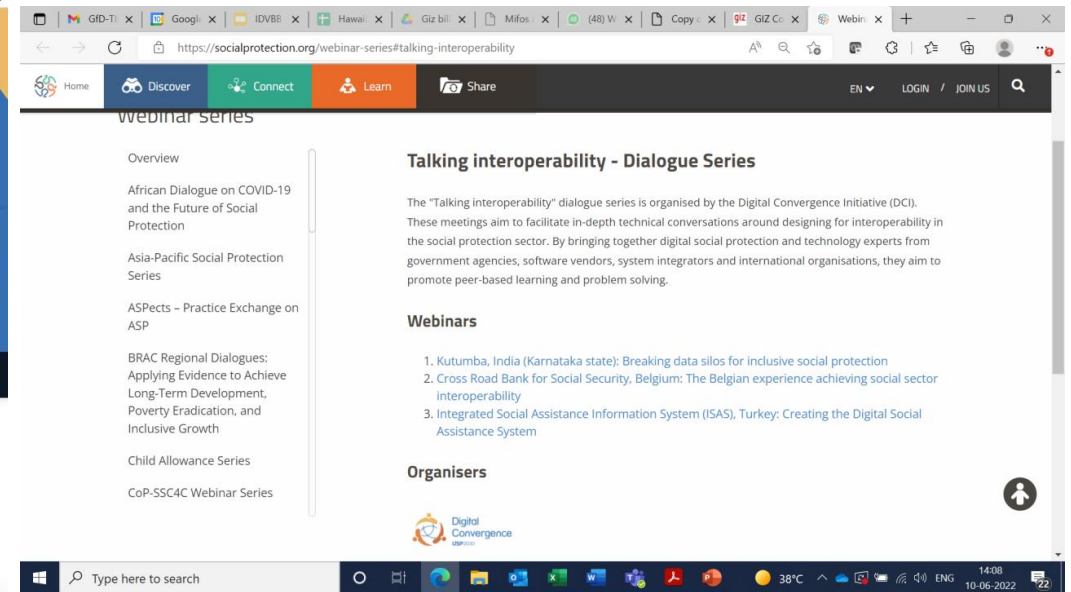

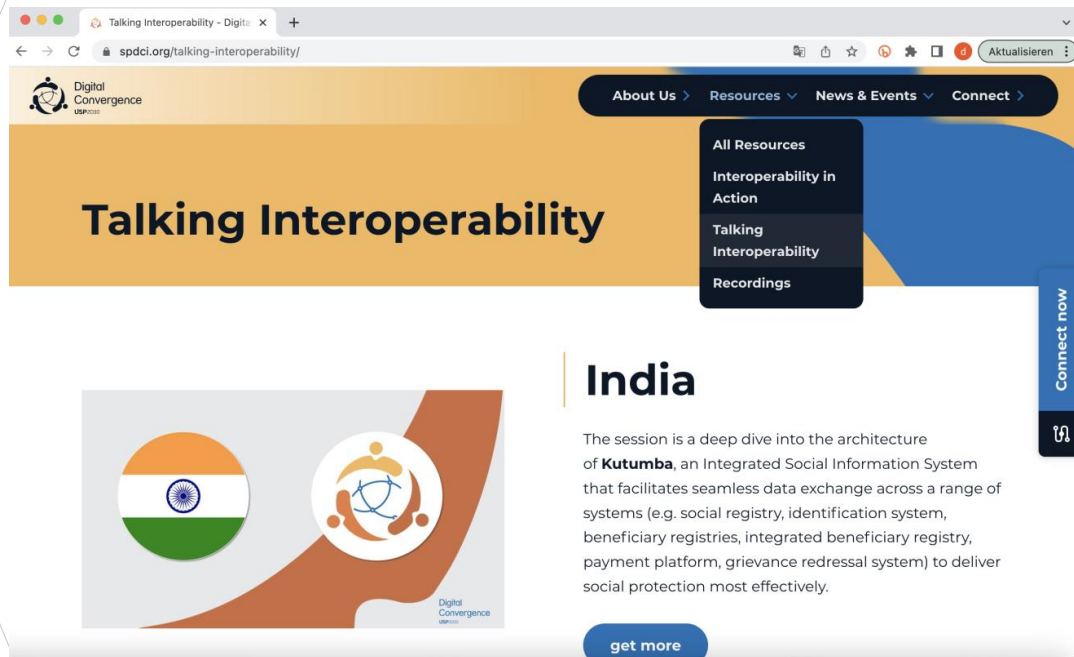

Deep dive into one country-level system per session to...

- share the technical nuts and bolts of how agencies have designed their social protection information systems for interoperability
- understand how agencies have tackled the major challenges to interoperability.
- brainstorm potential solutions to remaining bottlenecks

**Digital
Convergence**

National Unified Registry

Agenda

Poverty in Jordan & Government Interventions

Historical Background of the National Unified Registry

The Implementation of the National ID in Jordan

Current NUR Architecture

The Way Forward: The National Unified Social Protect Registry

NUR Technical Architecture

A Walkthrough in the National Unified Registry

Poverty in Jordan

Poverty Numbers

Poverty Percentage (pre-COVID)

Total Population

11.3M Individuals

2.345M HH

Government Cash Transfer Programs

The National Aid Fund

Unified Cash Transfer Program

- Target Group
 - Poor Households
- Coverage
 - 123K HH
 - 727K Individuals

Monthly Payment Program

- Target Group
 - Elders
 - Orphans
 - Permanent Inabilities
 - People with Disabilities
 - Unsupported Women
 - Divorced Women
 - Other categories
- Coverage
 - 94K HH
 - 300K Individuals

The National Unified Registry Historical Background

What is the National Unified Registry

The National Unified Registry is a backend data integrator that connects various citizen related governmental registries.

Historical Background

The Project was successfully implemented by 2019, aimed to set up as a data integrator

The platform was first tested during the implementation of the NAF Cash Transfer program expansion in 2019

In 2019, the cabinet formed a committee from the Ministry of Planning & International Cooperation, Ministry of Digital Economy & Entrepreneurship, and the National Aid Fund to oversee the platform and plan the transition into a social registry

National Unified Registry Committee

National Aid Fund

- Managing the Social Assistance Platform (CBT) Linked with the NUR (NAF MIS)

Ministry of Planning & International Cooperation

- Committee Chairmanship

Ministry of Digital Economy & Entrepreneurship

- Managing, maintaining & operating the NUR
- Adding new entities and facilitating the data access
- Building electronic portals for different parties to benefit from the system

Planning for a transition to a social registry by 2024

The Implementation of the National ID in Jordan

National ID Background

Nationalized use of the unified identifier for all Jordanians (ID use for individuals), given upon birth in the Civil Status Department

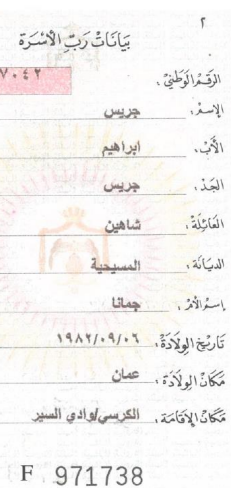

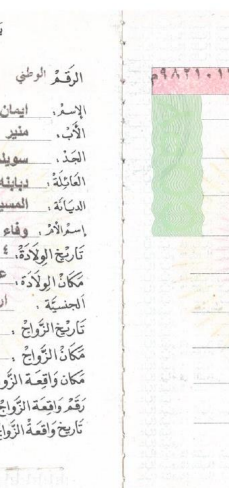

For each household, a family booklet is issued with a unique civil record ID, also registered in the Civil Status Department

All governmental entities in Jordan use the ID and the civil record ID, to document and track registries.

The GoJ uses a unique identifier for non-Jordanians in the country (personal ID)

Identification of Jordanian Citizens

Timeline of Implementing the National ID

1966

Establishing the Civil Status Department

1983-1988

Computerizing data documentation in the CSD
Developing the National ID

March 1992

The National ID is recorded on all Governmental documents

1996

National ID first used for Social Assistance by NAF

2002

NAF starting using the National ID in the MIS

The Use of the National ID

IN THE NATIONAL UNIFIED REGISTRY

Served as a unique identifier for the citizens

Served as the key to retrieve information about individuals from all registries

IN PAYMENTS

All bank accounts have the beneficiary National ID on the record

All e-Wallets are linked to the beneficiary National ID and the mobile number

Current Architecture

Key Success Factors

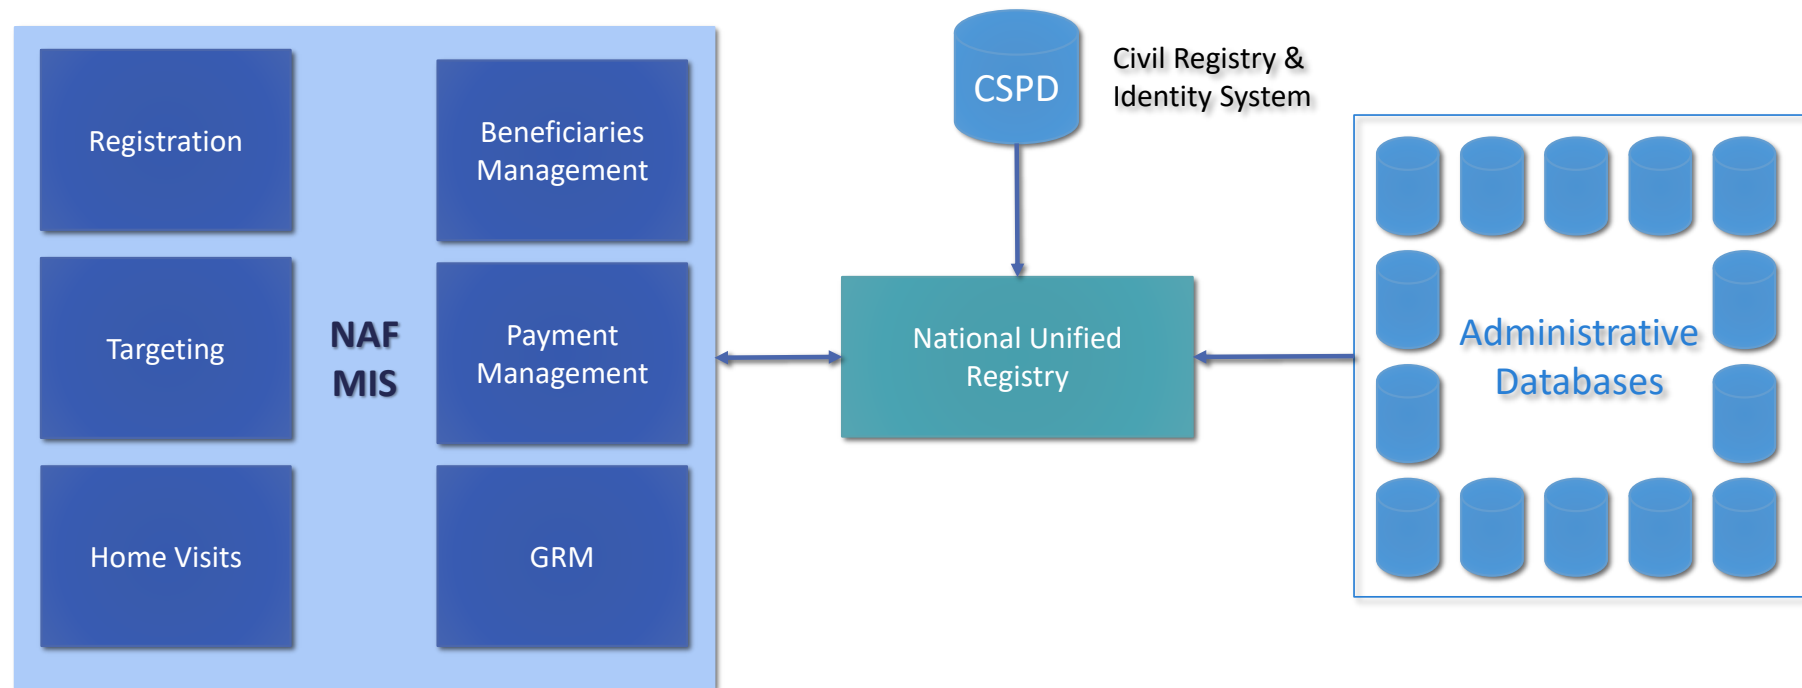

The presence of a well-maintained National ID structure

The connectivity of governmental agencies through a secure government network

The presence of a well-built government service bus

The National Unified Registry & NAF MIS

Entities & Registries

Entities & Registries

Businesses' Information

- Registry of Companies (*Companies Control Department*)
- Registry of Sole Proprietorships (*Ministry of Industry, Trade & Supplies*)
- Vocational Licenses Registry (*Greater Amman Municipality*)
- Registry of Bidders (*Government Tendering Department*)
- Registry of Importers & Exporters (*Jordan Customs*)

Employment & Skills Information

- Registry of Subscribers (*Social Security Corporation*)
- National Employment Platform – Sajjil (*Ministry of Labour*)
- Registry of Civil Servants (*Civil Service Bureau*)
- Registry of Qualified Applicants (*Civil Service Bureau*)

Education Information

- Registry of School Students (*Ministry of Education*)
- Registry of University Students (*Ministry of Higher Education & Scientific Research*)
- Registry of Vocational Training (*Vocational Training Corporation*)

Entities & Registries

Entities & Registries

Other
Information

- Registry of Financial Claims (*Ministry of Justice*)
- Registry of Bails (*Ministry of Justice*)
- Registry of Foreign Labour (*Ministry of Labour*)
- Registry of Juveniles (*Ministry of Social Development*)
- Registry of Travelers (*Public Security Directorate / Residency & Borders Department*)
- Registry of Alimony (*Supreme Judge Department*)

NUR & Citizens Data

Data is retrieved based
on the National ID

Authority is given by
the data custodian to
the requester based on
the *Minimum Viable
Data* concept

The Way Forward: The National Unified Social Protection Registry

What is a Social Registry

Social registries are information systems that support outreach, intake, registration, and determination of potential eligibility for one or more social programs

What does a Social Registry serve as?

Social Policy Role Inclusion System

- Gateway for individuals and families to be considered for potential inclusion in one or more social programs based on their condition assessment

Operational Role Information System

- Support registration and determination of potential eligibility for social programs
- Contain information on all registrants, regardless of their eligibility

The Vision of the National Unified Social Protection Registry (NUR-SP)

A unified gateway for citizens to access the
social protection services

Main Elements

Unified
Comprehensive

NUR Technical Architecture

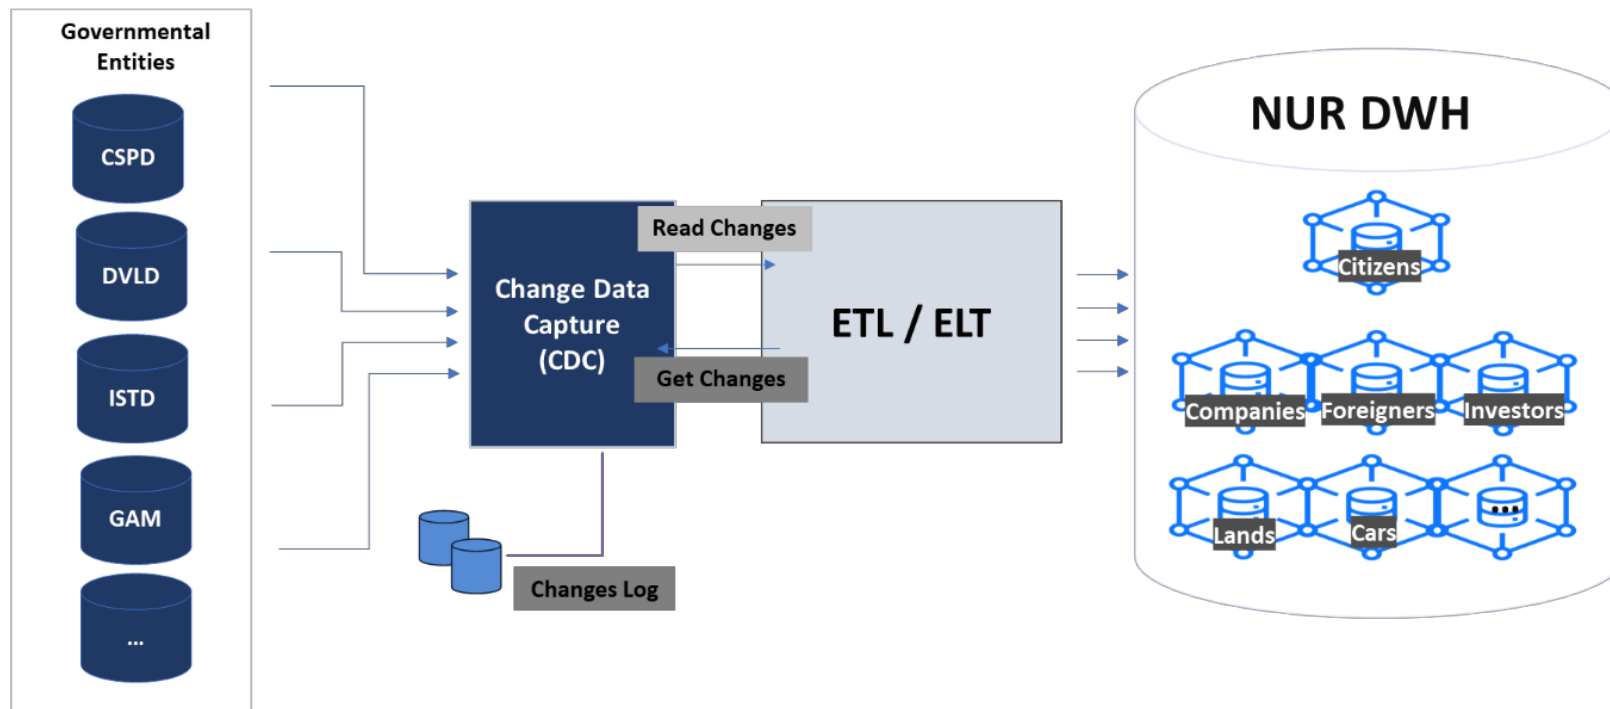

System Architecture

Conceptual Architecture

Data Exchange Protocols & Security

Data is loaded back-to-back using either CDC or ETL methods

Data is loaded into the data warehouse in a star-schema based on the National ID

Data is accessed by consuming agencies through APIs built automatically by the query builder

Access to data is given by the data custodian through defining accessible tables and columns for each consuming agency

NUR is published through a secure government network with no direct access to the internet

Support the Initiative

- **Support** the process of **consensus building** and **harmonization of standards**.
- **Spread awareness** about the initiative
- **Promote** adoption of **standards and other outputs**
- **Adopt the standards and other outputs** in your SP projects and share **feedback**

Participate in working groups

Group 1 : Payment layer interoperability
Group 2 : CRVS layer interoperability
Group 3 : Identification layer interoperability

Levels of participation

Level 1: Share existing materials
Level 2: Review outputs
Level 3: Join group discussions and validation workshops
Level 4: Drafting standards and guidelines alongside facilitators
